

# Improvement Project

Maryland  
Transportation  
Authority

## Project Description

*The I-95/MD 24 Improvement Project will help improve safety, reduce congestion and allow for increased traffic capacity.*

## Project Limits

The project limits extend along I-95 from just north of the MD 24 bridge over I-95 to just south of the I-95 bridge over Winters Run and along MD 24 from Edgewood Road to just north of the MD 924 intersection.

## Schedule

Work began in fall 2008 and is anticipated to be complete in 2011 and includes:

- Constructing a temporary MD 24 and MD 924/Tollgate Road intersection to facilitate construction of the future MD 24 and MD 924/Tollgate Road interchange
- Constructing a new MD 24 bridge over MD 924/Tollgate Road, including ramps, for the future interchange
- Widening the northbound MD 24 bridge over I-95 to accommodate the future traffic pattern on northbound MD 24

## What Drivers Can Expect

During construction drivers can expect:

- Temporary lane closures during off-peak traffic periods on I-95 and MD 24
- Increased congestion and delays, particularly during peak-traffic periods

A map of the project area and description of construction phases are on the reverse side.

The MDTA thanks you for your patience during construction and reminds you to **Stay Alert So No One Gets Hurt.**

Martin O'Malley, Governor • Anthony G. Brown, Lt. Governor

## STAY INFORMED

Call 1-877-368-1141 for recorded project information. You may leave a message after the recording. Staff will return your call within two business days.

## Phase 1: Complete

- A temporary intersection was constructed at MD 24 and MD 924/Tollgate Road, south of the existing intersection.
- The ramp from southbound MD 24 to southbound I-95 was realigned.

## Phase 2: Complete

- A portion of the new ramp from southbound MD 24 to southbound I-95 was completed.
- Ramps for the MD 24 and MD 924/Tollgate Road interchange were constructed to allow traffic to access the temporary intersection.
- Widening of the MD 24 bridge over I-95 was completed.

## Phase 3: Fall 2010 – 2011

- Construction of the new MD 24 at MD 924/Tollgate Road interchange.
- Construction on the MD 24 bridge over MD 924/Tollgate Rd.
- Widening the ramp from northbound I-95 to MD 24 (see A1 on map below).

## What should drivers expect?

- I-95 traffic will be shifted temporarily to facilitate ramp widening on northbound I-95 and resurfacing of both directions of I-95.
- The two temporary separate intersections at MD 24 and MD 924/Tollgate Road will cause delays.

New ramp patterns at the conclusion of the project include:

**Ramp A1** will access northbound and southbound MD 24; **Ramp C** will access MD 924 (Emmorton Road) and Tollgate Road; **Ramp J** will access northbound and southbound MD 24; **Ramp F** will access MD 924 (Emmorton Road) and Tollgate Road.
